AR-Mini · Teddy, the AI team and where everything lives

One loop ID everywhere: L014 is the tracker row, the iCloud folder, the CSV name and the commit message. · 07.10.2026

TEDDY
human in the loop

- decides, reviews every AI proposal
- prints, assembles, solders, wires
- measures, tests in water
- films and photographs (iPhone)
- sorts media into iCloud daily
- merges dev → main after the test

tasks →
← *proposals*

AI team · 8 agents
Claude Projects, Software agent in Cursor + Claude Code

- **Coordinator** → plan for the day — Claude
- **Mechanical** → .scad + hypothesis — Claude
- **Electrical** → wiring + checklist — Claude
- **Software** → firmware, commits — Cursor
- **Logistic** → BOM, orders — Claude
- **Media** → shot list, edit plan — Claude
- **Test & Data** → pass / fail — Claude, Gemini
- **Portfolio** → texts, LOG — Claude

GitHub · TKyoseva/ARmini
code, CAD, PCB, data, docs: small text files

- **ARmini/** private until reviewed — Teddy
  - README.md what AR-Mini is — Portfolio
  - AGENTS.md roles + rules — Coordinator
  - .cursor/rules/ar-mini.mdc dev only, check, commit — Cursor
  - .github/workflows/check.yml CAD · ERC/DRC · build — CI
  - **cad/** AR-Mini_v1.scad, interfaces.scad — Mechanical
  - **interfaces/** interfaces.json: CAD ↔ PCB — Electrical, Mechanical
  - **pcb/** xiao_breakout_rev0, carrier_revA — Electrical
  - **firmware/** platformio.ini, src/, bench/ — Software
    - include/secrets.h never committed — Teddy
  - **tests/** — Test & Data
    - protocols/ T001_draft.md …
    - data/ L014_2026-10-12_draft.csv
  - **bom/** bom.csv + latest xlsx — Logistic
  - **docs/** — Portfolio
    - LOG.md TIMELINE.md what happened, when
    - FAILS_AND_FIXES.md 142+ entries
    - decisions/ 0003-power-box-on-beams.md
    - img/ selected photos ≤ 500 kB — Media
  - **media/LINKS.md** L014 → iCloud folder link — Media
  - **scripts/** check.sh, sync_interfaces.py — Software

branches

- dev Cursor commits after each check — Cursor
- main Teddy merges after the test — Teddy

commit cad: arm length (110 → 115 mm) · L014

Claude Projects
where the agents think

Claude Max · Projects

- AR-Mini · Coordinator tracker export, plan R1–R3 — Coordinator
- AR-Mini · Mechanical .scad, renders, measurements — Mechanical
- AR-Mini · Electrical spec, sheets, pinout, datasheets — Electrical
- AR-Mini · Logistic BOM xlsx, shop notes — Logistic
- AR-Mini · Media shot-list template, iCloud map — Media
- AR-Mini · Test & Data protocols, CSV files — Test & Data
- AR-Mini · Portfolio LOG, FAILS_AND_FIXES, MIT brief — Portfolio

each Project

- Instructions common rules + role
- Knowledge files from GitHub main
- Chats one per loop: "L014 · draft"

Software agent

- Cursor Premium edits the repo, commits to dev — Software
- Claude Code flash, serial log, git — Software

helpers

- ChatGPT Plus second opinion on risky steps
- Gemini Plus test video, long datasheets — Test & Data

Sunday refresh Knowledge from main — Teddy

iCloud Drive · Media
big files: photos and video

- **AR-Mini-Media/** photos + video
  - 00_Inbox/ iPhone: Share → Save to Files — iPhone
  - 01_Loops/ — Teddy
    - L014_2026-10-12_bathtub-draft/
      - photo/ video/ data/
      - README.txt hypothesis · result
    - L015_…
  - 02_Parts/ each part next to a ruler — Media
  - 03_Prints/ first layer + finished — Media
  - 04_Releases/ R1_2026-10-13, R2_…, R3_… — Media
  - 05_Fails/ evidence for FAILS_AND_FIXES — Portfolio
  - 06_Edit/ selects, edit projects, exports — Media
  - 07_Portfolio/ final photos + video — Portfolio

file name

- 2026-10-12_L014_bathtub-draft_01.jpg
- 2026-10-12_L014_bathtub-draft_01.mov

every evening

- 00_Inbox → 01_Loops/L… rename, sort — Teddy
- best 1–3 → docs/img small copy to git — Media
- link → tracker + LINKS.md — Media

How files move

- **Media**: iPhone → iCloud 00_Inbox → Teddy sorts → 01_Loops/L014 → link in tracker
- **Code**: Claude Project → Cursor → check.sh → GitHub dev → Teddy → main
- **Knowledge**: GitHub main → Sunday refresh → Claude Projects → better proposals

Rules

- Big files (photo, video) never go into git: iCloud.
- One loop ID everywhere: tracker, folder, CSV, commit.
- Secrets only in secrets.h, never in a Project or a photo.
- Repo stays private until Teddy reviews it.
